ATS airline travel cases are designed around the airline regulations for carry on and checked luggage. Currently most airlines have a 45 inch(l+w+h) limit for carry on luggage and a 62" limit for checked baggage.

The cases offered in this section are optimized for size and weight to provide the maximum space for your gear while minimizing or eliminating oversize/overweight charges.

ATS Survivor Series cases are built tough to take the punishment that the automatic handling process can inflict and more important they're engineered to protect your valuable equipment trip after trip, year after year. We offer both standard size cases and custom size 62" cases to fit specific equipment.

Survivor Series Small Characteristics

- Meets ATA Spec 300.
